Why low tax for the rich means high tax and lower Govt support for the poor

The Indian tax system has been regressive for long with direct tax - controlled tax - coming to what happens in developed economies. It is also known that tax-deductible benefits corporates making higher profits than those who make lower. Both turn the cardinal principle of ability-to-pay or equity in taxation.

The National Capital’s Experience with Waste to Energy

Waste to energy plants (WTEs) use waste as a fuel for generating power like other power stations use coal, oil or natural gas. They typically burn mixed municipal solid waste to produce steam in a boiler that is used to generate energy. Waste is a stream of broken waste paper, plastic, organic waste and other similar waste generated at the household level. There are different types of nuclear to energy.
